OCTOBER 27, 1899, NORWAY AND SOUTH PARIS, MAINE.

VOLUME XXX.

Something Must Be Done.

The Gorham (N. H.) Mountaineer has the following to say in regard to our railroad situation:

"The intense feeling against the officials of the Norway Branch Railroad company increases rather than diminishes, for the reason that it cannot be learned that they are doing anything towards having passenger trains run again between Norway and South Paris. The people have always been noted for their push, integrity and business enterprise. That they will long submit to the present state of affairs, is not to be entertained for a moment. If ample facilities cannot be provided by means of the Grand Trunk direct, it is entirely within the probabilities that in less than a year trains will be running between Norway and Mechanic Falls and Lewiston to connect with the Maine Central. The route is a good one and the road would require very little excavating. Level headed business men say that such a road would pay. Norway once had a big fire that swept one side of its village out. It rose phoenix-like from its ashes, more beautiful and enterprising than ever. Within a few months it will be seen how superior Norway is to misfortunes like the present."

It is quite evident that the officers of the Norway Branch Railroad are doing nothing. They have a greater personal interest in the electric street railway, but the citizens who want train service continued on the Branch are doing something in a way that may be successful. Norway must and will have a good railway service connecting with the G. T. at South Paris or connecting with some other road.

The present electric car service is far from satisfactory. Sell tickets in and out good over the G. T. R. and carry and check baggage to and from Norway would come nearer being satisfactory than the present method of taking only passengers.

We want something done and done pretty soon too.

The water is so low in Lake Pennessowassee that there is only a small stream flowing through the channel in "The flowing." The rest is so dry that people can walk on the bottom of what was formerly a pond. It is a good time now to locate all the big rocks and stumps and get an idea of how the bottom of the pond looks.

A horse blanket, a cheap ulster and a wagon and harness were also found near there, the wagon being hidden in some scrub pines. The horse carriage and harness turned out to be the property of William Hartung, a farmer in the town of Manchester, some 40 miles east of here. They disappeared, Oct. 10, at the same time as one Albert Murray, who had been working for Mr. Hartung. The owner came after his property, Monday.
